### Index Analysis by Sentiment

Harshal 845 280 9989 Shirish 900 412 4816

A decade of research has led to KP Graphs as a means of predicting the intraday flow or movement of the Index.

The pro- of our efforts is available in the form of historical intraday KP Graphs for the years 2007 to 2016 in pdf format.

The minimum requirement for you to predict the index is the ability to understand simple mathematics between 5 numbers, each number represents a colour line having a max value from -15 to +15.

The first 3 lines or colours are L1, L2 and L3 which are the major levels to analyse and the next 3 are L4, L5 and L6 which modify the outcome of the result obtained from doing addition or subtraction between L1, L2 and L3.

Sentiment Analysis is used to Predict any of the major world Indices with NIFTY, NIFTY\_BANK and NZ50 AORD N225 KS11 TWII HSI SSEC FTSE DJI.

KP-Graphs of commodities like Crude, Natural Gas, Copper, Lead-Zinc, Gold-Silver, Alluminium and Nickel are also supported.

No	Cases	Rules Explained	Action /Out	
1	POS ↔ POS	+3 ↔ +2 implies +3 is reduced to +2	Below	+2
		+3 ↔ +5 implies +5 is more than +3	Above	+5
2	NEG ↔ NEG	-4 ↔ -1 implies -4 is increased to -1	Above	-1
		-4 ↔ -5 implies -5 is less than -4	Below	-5
3	POS ↔ NEG	+3 ↔ -1 implies +3 is reduced by -1	Below	+2
		+3 ↔ -5 implies +3 is reduced by -5	Below	-2
4	NEG ↔ POS	-4 ↔ +2 implies -4 is reduced by +2	Above	-2
		-4 ↔ +5 implies -4 is reduced by +5	Above	+1

## Analyse Directional Bias

Use KP-Graphs for Sentiment Analysis in support of Technical Analysis

The above rules are to be implemented first between L1 to L2 then use this output to interact with L3 level understand the outcome as this decides the directional bias, then consider L4 level with the same set of rules, hold the outcome and evaluate what L5 level offers. It can either support L4 by being above L4 level or oppose it by being below L4 level. Above -4 will be -2 and below -4 will be -6, also above +4 will be +5 and below +4 will be +2. Positive or negative numbers are only for relative reference they as such do not show the outcome but represent the sentiment.

**Index is modified by flow and interaction of L4, L5 & L6 with the outcome between L1, L2 and L3.**
